	<b>PRODUCTION</b>					

Dear Parent/Guardian

Your teen or pre-teen is very special to us. We want to help prevent unplanned pregnancies and the spread of sexually transmitted diseases, including AIDS, in this age group especially.

Your teen or pre-teen can receive family planning services from their primary care doctor or from any Planned Parenthood office (1-800-230-7526) free of charge. Their primary care doctor or other medical professional will talk with them, measure their sexual knowledge and experience, if any, and recommend family planning services when advisable.

Family planning services may include counseling (including not having sex), an evaluation, and, when appropriate, contraceptives. These may include prescriptions or a supply of birth control pills (taken every day of the month), condoms (rubbers) worn by the man, a diaphragm (a vaginal barrier), or other methods of birth control.

Like you, Arizona Physicians IPA wants your teen or pre-teen to have a healthy future. If you do not know who their primary care doctor is, call the our Customer Services department at 1-800-348-4058. We want to help you.
